

Our Heating and Renewables Framework

This specialist framework delivers a full range of domestic and commercial heating works to estates across the public sector and includes the provision of heating related renewable technologies. There is a specific education lot supported by the Department for Education.

Like all frameworks from Fusion21, the Heating and Renewables framework is run by technical experts and only features pre-qualified, accredited supply partners.

It covers a range of services from consultancy and quality assurance to design, servicing, maintenance and installation and offers a selection of renewable applications including air and ground source heat pumps, solar thermal, electric heating, hot water systems and district heating systems.

The framework includes an education specific lot supported by the Department for Education to assist schools, colleges, academies and further/higher education establishments with their heating requirements.

Framework features

- Sustainable range of heating solutions
- Managed by Gas Safe registered managers with full ACS accreditation
- Flexible call-off processes
- Supply partners appointed based on sector experience, competence and capability and selected by region to meet local delivery requirements
- Increased collaboration with local SMEs (more than 75% of appointed suppliers)
- Specific lot for education providers supported by the Department for Education

Working with Fusion21
