

Our Retrofit framework

We've developed a specialist framework to support energy efficiency improvements on domestic and commercial properties.

Like all frameworks from Fusion21, the Retrofit framework is run by technical specialists and only features pre-qualified, accredited supply partners.

Whether you're seeking singular or fully integrated solutions for retrofit works, this framework is designed to meet your requirements. It covers measures including cavity and solid wall insulation, lofts and floors, airtightness and controlled ventilation with heat recovery and renewable energy generation.

Framework features

- Compatible with various funding models - please ask us for details
- Can be used to access ECO funding through the supply chain
- National framework with suppliers appointed on a regional basis
- Robust selection process to ensure compliance and deliver quality standards on every project e.g. PAS 2030
- Applies to high-rise refurbishment with the inclusion of windows, renewable heating systems and energy efficient lighting

Fusion21 frameworks

We put together frameworks that help you **make a real impact**. They're designed to bring genuine, cashable cost efficiencies to your public sector work programmes without compromising on choice or compliance.

Our role is straightforward - to help you buy smarter and with confidence. Every supplier and contractor is required to meet the highest cost and quality standards. All our framework agreements are OJEU compliant and renewed on average every four years.

Why use a Fusion21 framework?

- Our frameworks typically save members up to 30% on market prices, plus additional indirect savings
- We work closely with you to deliver efficiency savings, sustainable products, project management services and the best possible value
- Mini-competition or direct award call off, for more information visit www.fusion21.co.uk/procurement
- Social value - every pound you invest helps to make a positive contribution in local communities
- No joining fee or annual charge
