

Our Retrofit Materials Supply framework

This framework provides members with the ability to directly source retrofit materials.

Like all frameworks from Fusion21, the Retrofit Materials Supply framework is run by technical specialists and only features pre-qualified, accredited supply partners.

Split into 10 lots, this national framework provides a range of materials including: external and internal wall insulation, solar photovoltaic panels and high performance electrical storage heaters - plus energy efficient lighting (including LED), mechanical ventilation (MVHR) and heat pumps.

Framework features

- Covers materials for domestic and commercial use
- All Microgeneration equipment is compliant with the Microgeneration Certificate Scheme Standard (MCS) and is eligible for Feed-In Tariffs (FITs) or Renewable Heat Incentives (RHI) when installed by an approved contractor
- Early engagement with suppliers will provide support with project design
- Use in conjunction with our Retrofit installation framework for even greater efficiencies

Working with Fusion21

Our procurement services help you to make a real impact, designed to bring genuine efficiencies to your public sector work programmes without compromising on choice or compliance.

Our role is straightforward – to help you buy smarter and with confidence. Fusion21 suppliers are required to meet the highest cost and quality standards, whilst all of our framework agreements and dynamic purchasing systems are fully compliant with EU, UK and Scottish legislation.
