

Heating and Renewables Lot 10 Framework supported by the Department for Education

This framework lot has been developed to support schools, colleges, academies and further / higher education establishments with their heating requirements. From major refurbishment to planned preventative and reactive maintenance requirements, available works include the design and installation of heating systems including gas, LPG, oil, renewable technology and electric.

The range of available sustainable technologies include air and ground source heat pumps, solar thermal, electric heating and hot water systems. Heating designs covered under this lot contribute to supporting government targets to deliver decarbonisation.

Framework features:

- Provides regional coverage and facilitates local delivery
- Flexible call-off processes
- Supply partners appointed based on sector experience, competence and capability
- Increased collaboration with local SMEs (more than 75% of appointed suppliers)
- Access a range of sustainable heating solutions
- Managed by Gas Safe Registered managers with extensive knowledge of member and supplier roles
- Robust framework specifications that can be further tailored to your requirements during a mini-competition
- Installation works may be undertaken on an install only or supply and fit basis

Key Information

This education-specific lot supported by the Department for Education assists education establishments with their heating requirements. It offers a range of services from consultancy to design, servicing, maintenance and installation plus a selection of renewable technology applications. Heating designs covered under this lot contribute to supporting government targets to deliver decarbonisation.
